

wasn't it?

A Yes, sir.

Q Do you know what kind of shells were in it?

A You mean the make?

Q Yes.

A They were Smith and Wesson.

MR. PALZER: Weren't they Peters?

MR. PFEIFFER: No, the Peters were the ones
found out there.

A Smith and Wesson center fire black powder lead bullets
common lead bullets.

Q Did you have a whole box of lead bullets?

A I might have, but I haven't any recollection of it.

Q Had you ever fired off the pistol with a bullet in
it?

A I don't have any recollection of it, because I tell you
why if you want me to go into detail. I knew the carrying
range power of those 32's and I always thought it was too
dangerous to fire it anywhere at all around the house;
and I also knew there was a law against persons carrying
a pistol without a license and I wasn't going to run
any risk.

Q So that so far as you can remember you never did
fire it off?
